We have a Real Estate Brokerage in Salisbury, Maryland, and a great deal of our work is dependant upon our computers. About 2 years ago, we were having some major problems and unsure who to call, I looked in the yellow pages. Just by chance Shawn's ad caught my eye, and I called him for help. Keep in mind that we had never had the opportunity to call him before, yet when I explained the problems we were having; he did not hesitate to come "rescue" us immediately, even though his schedule was full. We were very pleased with the quality of his work and have continued to use his expertise ever since. Not only does he continue to do any repairs and service work we may have, but we have purchased all of our new office's computers, our server, and our technological equipment from him as well. We would recommend Technology Contracting for all of your computer needs.
